Xymon is a free/open-source call recording solution for Asterisk and other softphones. Xymon allows the recording of all inbound/outbound calls of any user (with multiple user levels) on an Asterisk server. Call recordings can be saved locally, on a remote server, or both. Automatically and transparently, Xymon intercepts the call signaling (using any of the supported PBX softphones). Once a call is intercepted, it can be saved locally or remotely using a compatible (SIP) messaging server like jabber.org. It can also be viewed using any modern media player, using RFC2833 HTTP or a proprietary binary protocol. Xymon is available under the GNU GPLv2 license. TeamViewer Software is an award winning remote desktop and mobile device management solution for PCs, Macs and mobile devices. With over 6 million users and more than 500,000 installations around the world, TeamViewer is the most widely used remote control software and the world's leading solution for IT service professionals and their customers. RemoteEyes is a free software that lets you make free computer surveillance with your webcam. The program has a

real-time chat and notification system to see when the program is being used. You can also add a password to enable additional features of the software. Remote Backup Solution is a data backup software with a client/server architecture, which let's you backup your data with just a couple of clicks. On your computer you install the client software and configure it to automatically detect your hardware (with a one click setup procedure). The client then performs a backup in the background with customizable schedules and sends the data to our servers. There you can choose to store the backups for a period of time or just keep it on file for long term storage. You can also use the software to perform data recovery, image extraction or even image compression/decompression, all without installing any software on your computer. MyMediaDesk is a professional Windows application that streamlines content management, media and files management and archiving. It allows the user to share documents, photos, videos and music within the enterprise and with other users, adding a social aspect to the work environment. MyMediaDesk has a complete set of features for controlling, organizing and accessing digital content. WinSoftAR is a CD, DVD and a Blu-ray authoring, burning and managing software. It allows you to add audio

and video

What's New in the?
