Field of the Invention The present invention relates to a thick film potting composition, a manufacturing method of an integrated circuit substrate in which an integrated circuit and a thick film circuit are integrated, and an integrated circuit substrate manufactured by the method. 2. Description of the Related Art A process for integrating an integrated circuit and a thick film circuit on a substrate such as a glass substrate, a silicon substrate, and a ceramic substrate has been known. However, such a process has disadvantages in that it requires complicated steps and is inconvenient because of its low yield. Therefore, an object of the present invention is to provide a thick film potting composition which is suited for forming a thick film circuit and can be more readily integrated with a substrate, a method of manufacturing an integrated circuit substrate in which an integrated circuit and a thick film circuit are integrated, and an integrated circuit substrate. In one aspect of the present invention, the above object is attained by providing a thick film potting composition which comprises (A) a resin component comprising a resin having a 5% weight loss temperature of 150°C or lower, the resin being decomposed in an atmosphere having a 5% weight loss temperature of 150°C or lower or a nitrogen atmosphere; (B) a glass component comprising a glass having a softening point of 550°C or lower and a 5% weight loss temperature of 150°C or lower; and (C) a filler, wherein the content of the filler is 5% by weight or less relative to the total weight of the resin component and the glass component. Further, in another aspect of the present invention, the above object is attained by providing a method of manufacturing an integrated circuit substrate which comprises a process of forming a thick film circuit on a surface of a substrate and a process of forming an integrated circuit on the surface of the substrate, the method of manufacturing the integrated circuit substrate comprising the steps of: preparing a thick film potting composition which comprises (A) a resin component comprising a resin having a 5% weight loss temperature of 150°C or lower; and (B) a glass component comprising a glass having a softening point of 550°C or lower and a 5% weight loss temperature of 150°C or lower; and (C) a filler, wherein the content of the filler is 5% by weight or less relative to the total weight of the resin component and the glass component.

(Only 30 notes) New Mods; Dragon Age: Origins; Dragon Age 2; Frozenbyte: - Improved Installation; Other Games; Dragon Age (Interface and Usability)Here is a sample of bad English from the extreme-right website Breitbart. To be sure, the examples below are taken from a single article about immigration. But they are representative of the overall tone and content of Breitbart's various media platforms. They are so extreme that when staffers at the company were asked to write responses to negative media coverage of their work, they resorted to misleading the public about Breitbart's goals. This paragraph is from a story by Paul Joseph Watson in January, about refugees who allegedly committed violent crime: A Google search suggests that a Swedish woman who went on a knife attack spree in Gothenburg has been described as a "Muslim refugee" and a "future terrorist" by sites like Breitbart. Not only did the Australian-born woman allegedly leave multiple children dead, she also allegedly encouraged other refugees to come to Sweden via their Facebook group, Refugee Offenders in Sweden. The 46-year-old woman will be charged with murder and attempted murder on January 25. Breitbart later updated this with the following information: The woman who is alleged to have committed the Swedish murders was named by multiple Swedish media outlets as "a native-born citizen," and not a "refugee." The story was featured in an original Breitbart piece titled "Sweden: Democrats Fail in 'Appeasement' After Muslim Terror Attack." However, the user running the story on the
