UNSUSTAINABLE MOVEMENT View joseph on AVEXIS
MIDDLE-RANGE REVIEWER DEGREE = 81 / 100 THIS GAME NEEDS TO BE ON PRE-ORDER LIST AND SOLD OUT FROM AMAZON! It only takes 1 or 2 tries for me to find out this game is impossible to play (with many minor bugs and glitches you have to wait till you're done with it to apply in game controller support). I love the story but the game is a real pain to play especially on a single player. This game is an absolute joke, avoid at all cost. I was so excited when I played this game and had \$20 to play it, not to mention

its a \$20 game... but when you try to play it you will find over \$40 it will take you to purchase items to play the game and as if that is not bad enough, if you can't access the controls on the gamepad you will have to wait for the game to auto restart so you can switch to controller so this game is a terrible joke that's being played right now. Avoid at all cost. Was this review helpful to you? Yes November 24, 2015 2 of 4 people found this review helpful VERY LARGE WORLD View The world of avexis is large and has a very nice landscape, castles, very big dungeons, and a great variety of rooms. But these elements are badly connected from one another, and it is very difficult to move. There are also annoying bugs, from things like fail to buy, to nothing happening when pressing O, or the need to jump a distance that is outside of the passage that leads to that room, not to mention the very poor speed of movement when attempting to move. For a game that is on steam, it is a very poor quality game, and better avoid this game at all costs. Was this review helpful to you? Over the past several months, we've been improving the debugging process for our game. We had been unable to perform debugging action while locating an intruder in the world. In the process of testing NPC systems for AiAPI, we saw the necessity of reworking debugging functions to improve debugging operations. During the debugging process, we began to realise that the world is growing in size. Consequently, debugging has become complicated. In the process of developing new debugging functions, we've also established new NPC systems that allows us to place every NPC in the world simply through the voice command. Using this system, we can freely control the AI of the NPCs in any part of the world.
