The game takes place in the far future, where the earth has suffered a nuclear holocaust and become a cold and desolate place. Humanity has fled to the only habitable world, a hollowed out Earth called The Ark. It is. As a soldier in Ark's Green Army you'll be forced to explore, raid and scavenge for supplies, weapons, engineers and ammo. This game has great potential and promises to be an ambitious title. It's got a somewhat bleak survival. You have to figure out how to keep your shelter running until you can construct a vehicle and get a chance to explore the environment. You start with a basic pistol and nothing but a few supplies, but as time progresses you are able to gather more and more guns and gear. You'll be in constant danger of being attacked by wild animals, human survivors or other groups of survivors, whilst scavenging for resources and working out your best way of survival. You might be guided to the nearest town for a chance to go on a raid against a smaller enclave, but it is all based on rations, so expect to be running short of a lot of things. Each time you complete a mission you are rewarded with money, ammo and food for the next couple of hours. Your main base can also be upgraded as you expand the area, building new areas, roads and things. You start with a tiny square of land to build on, but each time you complete a task you get a free piece of land and eventually the whole map is covered in places to build on. In addition to building and crafting you'll have to deal with threats outside of the environment, in the form of raids, races, quests and combat. You can use your creativity in building your own weapons, vehicles and equipment in an effort to stop your enemies (and that's what most
