Version history AutoCAD Crack Mac has undergone a long and continuing series of development, and various official releases have been given numbers, such as AutoCAD 2011, AutoCAD 2012, AutoCAD 2014, AutoCAD 2015, AutoCAD 2016, AutoCAD 2017, AutoCAD 2018 and AutoCAD 2019. Version numbers were also used to label major releases, including AutoCAD LT, AutoCAD LT Pro, AutoCAD Classic, AutoCAD 2013, AutoCAD 2014, AutoCAD 2015, AutoCAD 2016, AutoCAD 2017, AutoCAD 2018, AutoCAD 2019, AutoCAD 2020, and AutoCAD LT 2020. These versions use the versioning conventions for Microsoft Windows: a major version number (e.g. 12) and a minor version number (e.g. 16). In September 2012, Autodesk announced the intent to use a six-part numbered series for Autodesk software, which would eventually be adapted into a one-to-two-year cadence: Autodesk AutoCAD 2013, AutoCAD 2014, AutoCAD 2015, AutoCAD 2016, AutoCAD 2017, and AutoCAD 2018. The first version of AutoCAD to receive the new numbering scheme, AutoCAD 2013, was released on 16 March 2013. The new format would be adapted into the one-to-two-year cadence. AutoCAD's position in the Autodesk software suite is as an independent application. Historically, the branding and branding of AutoCAD (and AutoCAD LT) have been separate from the branding and branding of the other applications in the Autodesk suite, although the names for the products are often identical. In addition, the original release of AutoCAD LT was branded as AutoCAD LT, but was rebranded in subsequent releases as AutoCAD LT Pro. Autodesk's Naming Strategy Autodesk has always included a name for each product in the Autodesk suite. Beginning with AutoCAD 2000, the Naming Strategy was changed so that products were numbered, rather than named: AutoCAD 2000 became AutoCAD 2000, AutoCAD 2002 became AutoCAD 2002, and so on. In addition, when a new product was released, existing products in the suite would be rebranded to match the new numbering. For example, AutoCAD 2000 would be rebranded to AutoC a1d647c40b
